Universal & Oil Only Sorbents for Industrial Use

Sorbent Pads & Rolls

Universal/Maintenance Sorbents

Fine Fiber Meltblown Pads and Rolls

Low Lint & High Absorbency

Dark gray pads hide grime which makes pads last longer. Low linting sorbents are used where added strength is a must. The smooth fine fiber surface adds the strength needed for high traffic areas. Using small diameter strands of fiber increases surface area, it enables pads and rolls to grip surfaces securely.

Features

- Top and bottom layers of fine fiber are built of densely-woven, small-diameter strands of fiber to increase surface area, enabling the mat to grip the floor and secure it for safe walking
- A 3-ply construction with a layer of melt blown polypropylene ultrasonically sandwiched between two fine fiber layers makes this mat virtually indestructible to foot traffic

- A random assembly of large-diameter melt blown polypropylene fibers creates a high-loft inner layer.

Applications

- Used to contain and absorb splashes and spills under and around machinery

Part No.	Description	Size	Sorbent Capacity	Packaging	Weight

28312	Single weight roll – gray	30" x 300'	50 gallons	1 roll	30 lbs.

Oil-Only For Industrial Applications

Bonded Meltblown Pads and Rolls

Durable

These pads and rolls are formed by bonding two layers of standard meltblown polypropylene. This process creates a higher surface area, which enables pads and rolls to soak up liquids quickly. Bonding also adds increased strength and lowers linting of fibers. They help provide a cleaner and safer working environment.

Features

- Twin Bonded layers of melt blown polypropylene creates high surface area enabling the mat to suck up liquid quickly – great for over spray areas and indoor spills
- Twin layered random assembly of large diameter melt blown polypropylene fibers creates a high loft inner layer

- Ultrasonic weld points fuse the layers of melt blown polypropylene fibers together
- Keeps its shape when fully saturated

Applications

- Used to contain and absorb oil splashes and spills under and around machinery

Sorbent Pads & Boom

Oil-Only Spill Response Products

Standard Meltblown Pads

Environmental Contractors Grade

Quick absorbing and highly versatile. Use standard meltblown pads for cleaning spills on land and water. These low cost sorbents are ideal for a variety of environmental applications.

Features

- Loose stacked-weave construction increases surface area on spill. Starts absorbing on contact
- Meltblown polypropylene fibers are left in their natural hydrophobic state. These hydrophobic fibers repel water (and float) while only absorbing oils and other hydrocarbons

- Large-diameter Meltblown polypropylene fibers are randomly assembled to create a high-loft mat

Applications

- Cleaning spills on land & water
- Ideal for a variety of environmental applications

Booms

Linkable

Linkable booms are used to contain and absorb spills on or off water. The built-in stainless steel connectors link booms together to cover large areas of water. Booms are encased with a lint free poly sock that prevents shedding.

Features

- Strong mesh outer skin encases a poly sock sleeve filled with highly sorbent polypropylene
- Filler won't shed and booms won't sink, even when saturated with oil
- The Built in connectors link booms together to cover large areas of water

Applications

- Used to contain and absorb spills on or off water
