

FINGERLESS GLOVES

M-PACT ULTIMATE DEXTERITY WITH KNUCKLE PROTECTION

The M-Pact® Fingerless Glove has been designed to combine the utmost dexterity with knuckle protection. Featuring a new sonic welded molded rubber on knuckles, and high impact PORON® XRD™ in the palm to absorb more shock and vibration associated with repetitive tasks than its much thicker, traditional EVA foam counterpart.

CG FRAMER PROTECTION FLEXIBILITY COMFORT

Mechanix Wear has taken the real-world demands of framers, added the technology learned at the racetrack, and integrated the two into a single glove that will blow away anything you've come to expect from a framer's glove. The CG Framer Glove gives you a combination of Genuine Leather and Clarino MWX-2 Synthetic Leather for improved durability, an anatomically shaped padded palm for maximum movement and protection against abrasion and fatigue, and a fingerless index and middle finger to deliver the utmost sensitivity when handling nails or other small items.

CG4x FRAMER WITH MATERIAL 4x™

When the job is on the line, feel the added protection from Material4x™ reinforced fingers, palm and knuckle area. Anatomically shaped padded palm adds maximum movement and protection against abrasion and fatigue, while a fingerless index and middle finger deliver the utmost sensitivity when handling the smallest items.
