

3M™ Fire Barrier Moldable Putty+

3M™ Fire Barrier Moldable Putty stick 1.5" x 6", P/N 74585
3M™ Fire Barrier Moldable Putty 4"x 8" x 1/8" Pad, P/N 74586

Restores the Integrity of Fire-rated Building Construction

Designed for use as a one-part, 100% solids intumescent firestop.

- Ideal for construction gaps, cable, insulated pipe, electrical conduit and metal pipe
- Designed to provide up to a 4-hour fire rating
- UL-classified for telecommunications applications (interduct, fiber optic and cables)
- Remains pliable and flexible
- Won't dry out or crumble
- Convenient pad and stick form
- Non-halogen formula
- Reenterable
- Adheres to all common building surfaces including metal and plastic electrical boxes
- Provides draft and cold smoke seal even before temperature increases
- Intumescent and expands to form a hard char – prevents the transmission of hot gases & fire
- Great for building maintenance applications
