

# FIRE & RESCUE

## RECIPROCATING SAW BLADES

When lives are on the line, only the best will do. These are the blades preferred by most professional firefighters.

- Wavy Tooth Set Reduces Pinching During Cuts
- 0.062" Blade Thickness for Little or No Bending
- Available in 6", 9", and 12" Lengths

### Features

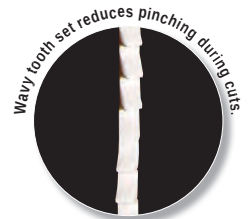

- Bi-metal HSS construction
- Profile designed for plunge cutting
- 10 TPI

### Benefits

- Smooth, quick and efficient cutting of layered materials
- For professional extrication uses
- Reliable, long lasting cutting edge
- Cuts more smoothly through a variety of materials without binding
- Thicker than most blades to prevent bending and pinching

### Advantages

- Greater heat resistance
- Greater beam strength
- Greater blade rigidity
