

# SAFETY DATA SHEET

CHROMATE INDUSTRIAL CORPORATION®

5250-A Naiman Parkway, Solon, OH 44139 • 888-567-2206 • www.chromate.com

	1. IDENTIFICATION
PRODUCT NAME: E-Z Poxy <sup>™</sup> 200	DATE PREPARED: August 10, 2015
PART NUMBER: 74502	MANUFACTURER: CHROMATE INDUSTRIAL CORPORATION 5250-A Naiman Parkway, Solon, OH 44139 • (888) 567-2206 www.chromate.com
	EMERGENCY TELEPHONE NUMBER OF THE COMPANY: (888) 567-2206
	PRODUCT INFORMATION TELEPHONE NUMBER: (888) 567-2206
	<b>REGULATORY INFORMATION TELEPHONE NUMBER:</b> (888) 567-2206
	TRANSPORTATION EMERGENCY TELEPHONE NUMBER: (800) 424-9300
	NATIONAL POISON CENTER: (800) 222-1222
	2. HAZARDS IDENTIFICATION
OSHA/HCS status:	This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).
Classification of the substance or mix	xture:SKIN CORROSION/IRRITATION - Category 2SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2BSKIN SENSITIZATION - Category 1
×	
Signal word:	Warning
Signal word: Hazard statements:	Warning! Causes skin and eye irritation.
•	
Hazard statements:	Causes skin and eye irritation.
•	Causes skin and eye irritation.
Hazard statements: Precautionary statements	Causes skin and eye irritation. May cause an allergic skin reaction.
Hazard statements: Precautionary statements	Causes skin and eye irritation. May cause an allergic skin reaction. Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. Wash contaminated
Hazard statements: Precautionary statements Prevention:	Causes skin and eye irritation. May cause an allergic skin reaction. Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse
Hazard statements: Precautionary statements Prevention:	Causes skin and eye irritation. May cause an allergic skin reaction. Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue
Hazard statements: Precautionary statements Prevention:	Causes skin and eye irritation. May cause an allergic skin reaction. Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. Wash contaminated
Hazard statements: Precautionary statements Prevention: Response:	Causes skin and eye irritation. May cause an allergic skin reaction. Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical attention.
Hazard statements: Precautionary statements Prevention: Response: Storage:	Causes skin and eye irritation. May cause an allergic skin reaction. Wear protective gloves. Wear eye or face protection. Avoid breathing dust. Wash hands thoroughly after handling. Contaminated work clothing should not be allowed out of the workplace. IF ON SKIN: Wash with plenty of soap and water. Take off contaminated clothing. Wash contaminated clothing before reuse. If skin irritation or rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for several minutes. FOR CHEMICAL

EMERGENCY

Call ChemTrec day/night: 1-800-424-9300

#### Substance/mixture: Mixture.

Ingredient name	% by weight	CAS number
reaction product: bisphenol-A-(epichlorhydrin); epoxy resin	10 - 30	25068-38-6
reaction product: bisphenol-A-(epichlorhydrin); epoxy resin	5 - 10	25068-38-6
crystalline silica non-respirable	0.1 - 1	14808-60-7

## Occupational exposure limits, if available, are listed in Section 8.

# **4 FIRST-AID MEASURES**

#### Description of necessary first aid measures

Description of necessa	iny mat and measures
Inhalation:	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact:	Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Eye contact:	Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Ingestion:	Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

## Most important symptoms/effects, acute and delayed

#### Potential acute health effects

Inhalation:	No known significant effects or critical hazards.
Skin contact:	Causes skin irritation. May cause an allergic skin reaction.
Eye contact:	Causes serious eye irritation.
Ingestion:	Irritating to mouth, throat and stomach.

## Over-exposure signs/symptoms

Inhalation:	No specific data.
Skin contact:	Adverse symptoms may include the following: irritation, redness.
Eye contact:	Adverse symptoms may include the following: pain or irritation, watering, redness.
Ingestion:	No specific data.

## Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician:	Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been
	ingested or inhaled.
Specific treatments:	No specific treatment.

## See toxicological information (Section 11)

Page 2 of 10

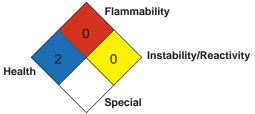

# **5. FIRE-FIGHTING MEASURES**

#### Extinguishing media

**Suitable extinguishing media:** Use an extinguishing agent suitable for the surrounding fire. **Unsuitable extinguishing media:** None known.

Specific hazards arising from the chemical: No specific fire or explosion hazard.

National Fire Protection Association (U.S.A.):

Hazardous thermal decomposition products:	Decomposition products may include the following materials: carbon dioxide, carbon monoxide, sulfur oxides, halogenated compounds, metal oxide/oxides.
Special protective actions for fire-fighters:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters:	Fire-fighters should wear appropriate protective equipment and self-contained breathing

# apparatus (SCBA) with a full face-piece operated in positive pressure mode.

# 6. ACCIDENTAL RELEASE MEASURES

#### Personal precautions, protective equipment and emergency procedures

i oloonal productiono, prococito e	squipment and emergency preceduled
For non-emergency personnel:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding
	areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilled
	material. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put
	on appropriate personal protective equipment.
For emergency responders:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on
	suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions:	Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
	Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways,
	soil or air).

#### Methods and materials for containment and cleaning up

- **Small spill:** Move containers from spill area. Avoid dust generation. Using a vacuum with HEPA filter will reduce dust dispersal. Place spilled material in a designated, labeled waste container. Dispose of via a licensed waste disposal contractor.
- Large spill: Move containers from spill area. Approach release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Avoid dust generation. Do not dry sweep. Vacuum dust with equipment fitted with a HEPA filter and place in a closed, labeled waste container. Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

## 7. HANDLING AND STORAGE Conditions for safe Store between the following temperatures: 5 to 30°C (41 to 86°F). Store in accordance with local regulations. storage, including any Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatibilities: incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. Precautions for safe handling Protective measures: Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container. Advice on general Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and occupational hygiene: processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. 8. EXPOSURE CONTROLS / PERSONAL PROTECTION **Control parameters Occupational exposure limits:** Ingredient name CAS # **Exposure limits** 14808-60-7 OSHA PEL Z3 (United States, 9/2005). Notes: 250/(%SiO2+5) crystalline silica non-respirable TWA: 250 MPPCF / (%SiO2+5) 8 hours. Form: Respirable OSHA PEL Z3 (United States, 9/2005). Notes: 10/(SiO2+2) TWA: 10 MG/M3 / (%SiO2+2) 8 hours. Form: Respirable ACGIH TLV (United States, 3/2012). TWA: 0.025 mg/m<sup>3</sup> 8 hours. Form: Respirable fraction NIOSH REL (United States: 1/2013). TWA: 0.05 mg/m<sup>3</sup> 10 hours. Form: respirable dust OSHA PEL Z3 (United States, 9/2005). Notes: 30/(%SiO2+2) TWA: 30 MG/M3 / (%SiO2+2) 8 hours. Form: Total dust. Appropriate engineering controls: Good general ventilation should be sufficient to control worker exposure to airborne contaminants. Environmental exposure controls: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels. Individual protection measures Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking Hygiene measures: and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.

Respiratory protection:Use a properly fitted, particulate filter respirator complying with an approved standard if a risk<br/>assessment indicates this is necessary. Respirator selection must be based on known or anticipated<br/>exposure levels, the hazards of the product and the safe working limits of the selected respirator.

8. EXPC	OSURE CONTROLS / PERSONAL PROTECTION CONTINUED
Skin protection	
Hand protection:	Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection:	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection:	Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Eye/face protection:	Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.

# 9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance	
Physical state:	Solid.
Color:	Off-white. Beige.
Odor:	Pungent.
Odor threshold:	Not available.
pH:	Not available.
Melting point:	Not available.
Boiling Point:	Not available.
Flash point:	Closed cup: Not applicable. [Product does not sustain combustion.]
Evaporation rate:	Not applicable.
Flammability (solid, gas):	Not available.
Lower and upper explosive	Not available.
(flammable) limits:	
Vapor pressure:	Not available.
Vapor density:	Not available.
Relative density:	2.247
Solubility:	Not available.
Solubility in water:	Not available.
Auto-ignition temperature:	Not available.
Decomposition temperature:	Not available.
Viscosity:	Not available.

# **10. STABILITY AND REACTIVITY**

Reactivity:	No specific test data related to reactivity available for this product or its ingredients.
Chemical stability:	This product is stable.
Possibility of hazardous reactions:	Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid:	No specific data.
Incompatible materials:	No specific data.
Hazardous decomposition products:	Under normal conditions of storage and use, hazardous decomposition products should not be
	produced.

# **11. TOXICOLOGICAL INFORMATION CONTINUED**

## Symptoms related to the physical, chemical and toxicological characteristics

Eye contact:	Adverse symptoms may include the following: pain or irritation, watering, redness.
Inhalation:	No specific data.
Skin contact:	Adverse symptoms may include the following: irritation, redness.
Ingestion:	No specific data.

#### Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate effects: Not available.

Potential delayed effects: Not available.

Long term exposure

Potential immediate effects: Not available.

Potential delayed effects: Not available.

Potential chronic health effects: No specific data.

General: Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels.

Carcinogenicity: No known significant effects or critical hazards.

Mutagenicity: No known significant effects or critical hazards.

Teratogenicity No known significant effects or critical hazards.

Developmental effects: No known significant effects or critical hazards.

Fertility effects: No known significant effects or critical hazards.

#### Numerical measures of toxicity

# **13. DISPOSAL CONSIDERATIONS**

Disposal methods: The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

## RCRA classification: Not applicable.
