Strip a minimum of 1/4" of the insulation from the terminal end. Make sure the wire is properly seated and crimp the terminal terminals 1/4" of the metal exposed to the terminal end using an insulated crimping tool that matches the color or gauge of the terminal. Apply heat (heat shrink) to the length of the tubing (covering the crimp area) until the tubing fully retracts and the adhesive flows. Cut the tubing to the proper length. Remove from the heat and set cool for the ULTRATE connection.
